Live Bottom Trailers and Live Bottom Truck Mounts are recognised as one of the best solutions for unloading materials. Paving jobs can take full advantage of all the best features of Live Bottom Trailers. Microsurfacing is a cost-effective pavement preservation treatment that extends the life of asphalt roads by applying a thin, durable layer of a special mixture to the surface, preventing oxidation and moisture penetration. GINCOR Werx Live Bottom Trailers offer Microsurfacing Attachments as an optional feature. This add-on turns the most efficient trailer for paving jobs into the ultimate solution for paving excellence.
